

Bibliography of Polar SuperDARN Radar Research (1980 - 2025)

This document lists all publications from the official SuperDARN Canada registry that actually use data from the 9 polar SuperDARN radars (geomagnetic latitude $\geq 70^\circ$). Publications are validated using operational start-year filters (only matching papers published in or after the operational startup year of the radar used) to ensure data validity. Crossref scholarly metadata was used to resolve citation metadata.
